# Business-Grade Connectivity for Home Worker Productivity.

Eliminate hours of lost productivity by giving work-at-home employees a smarter, faster, more secure connection.

Existing Primary Residential Connection.

Cellular Standby kicks-in immediately when primary connection fails/degrades. *Included

HDWAN

Our new service, **HD**WAN, delivers improved network performance for employees struggling to connect and be productive.

Turn employee residential Internet into a fully-managed, redundant network connection with application prioritization and encryption to maintain network policies while employees work from home.

Faster, more reliable network connection with routing smarts to make employees more comfortable with online tasks and activities.

1 Application priority for incoming and outgoing traffic (QoS).

2 Optional separation of WAN and Non-WAN traffic.(Internet Breakout)

3 Traffic Encryption for increased security.

4 Seamless, same-IP failover of traffic from primary to standby-link.
